CM **Customisation**

Content Manager has some amazing features, but the interface can be confusing, it looks dated, and has limited mobile access.

Why not have your own custom interface, so you can access your existing CM data more easily, on more devices, while still maintaining all of CM's security features!

WyldLynx

WyldLynx

Custom Interface Features

✓ Leverage one of our pre-built interfaces

✓ Design an interface to suit YOUR needs

✓ Personalised to your organisation

✓ Optimise layouts to reduce the amount of actions a user needs to perform for common functions

" I can now access every document and function that I need quickly and easily - and from my phone!"

User Feedback

DESIGNING A CUSTOM INTERFACE

Leveraging the powerful and robust back-end of Content Manager, WyldLynx can create an alternate interface to your existing CM system, to be used via standard browsers and devices.

Designed in consultation to match your organisations styling, access to documents and chosen functions can be streamlined to suit your users needs and increase productivity.
