

# Data Discovery

Data Discovery by Micro Focus® provides secure data management, analytics and regulatory compliance for your structured- and unstructured-data, all from the Cloud.

## Features and Functionality

- ✓ SaaS-based, secure Cloud File Analysis
- ✓ Multiple databases and file types supported
- ✓ Provides analytics and insights into your data via an intuitive graphical interface
- ✓ Identify and Index, Analyse and Organise, Manage and Migrate
- ✓ Make decisions and action changes directly from the interface
- ✓ Ability to automate searches

*“ Being able to get such a useful insight into all of our files and data was amazing, and much cheaper than we expected - especially in the cloud!”*

*User Feedback*

Data Discovery brings sensitive data analytics and discovery features securely to the Cloud.

File analysis, tagging, analytics, personal data discovery, review and control of data within on-premise and cloud-stored unstructured repositories are all included.

Data Discovery offers everything you need to understand your data, while removing traditionally cost-prohibitive barriers to entry.
