

DocuSign

Since pioneering e-signature technology, DocuSign has continued to push development and innovation, helping organisations to automate agreement processes and streamline their existing practices.

DocuSign is the next step in removing paper from your process.

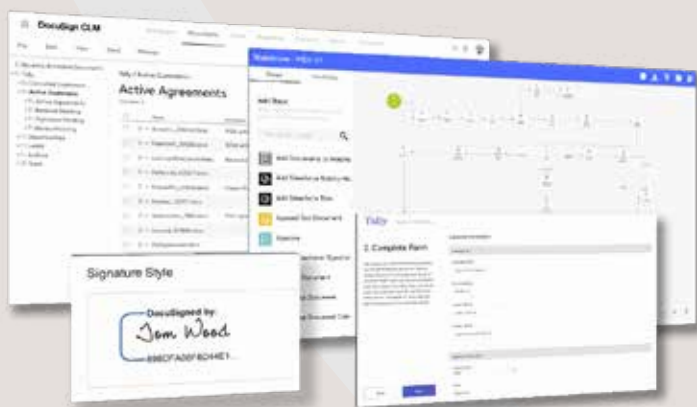

Features and Functionality

- ✓ Streamline your contract approval process
- ✓ Integrate with more than 350 systems 'out of the box', with an API to connect to even more
- ✓ Seek approval directly from within Content Managers existing process
- ✓ Audit each step in the approval chain
- ✓ Free for customers to sign
- ✓ Legally binding signatures
- ✓ Sign in Word and Outlook

“Taking away the need to sign and deliver papers back and forth was the best thing we've ever done with our contracts!”

User Feedback

With more than 350 existing integrations already built into the DocuSign platform, as well as a robust API, organisations can embed and connect their mobile apps, websites and workflows seamlessly.

By granting the ability to sign agreements electronically on practically any device, from almost anywhere at any time, the DocuSign platform can replace slow, manual and error-prone, paper-based agreement processes, eliminating the paper and connecting your existing systems.
