

# SmartDispose

The WyldLynx SmartDispose add-in allows end users to remove records from their view.

It requires users to apply a reason, which is then added to the notes of the record.

Records administrators can then apply appropriate retention and disposal as required.

WyldLynx

Linking Business & Technology

## Features and Functionality

- ✓ Simple to use for end users
- ✓ Configurable reasons for disposal, based on organisation requirements
- ✓ Configurable options for each reason (eg. ensure mandatory duplicate numbers are selected)
- ✓ Allow end users to quality-assure their staffs disposals

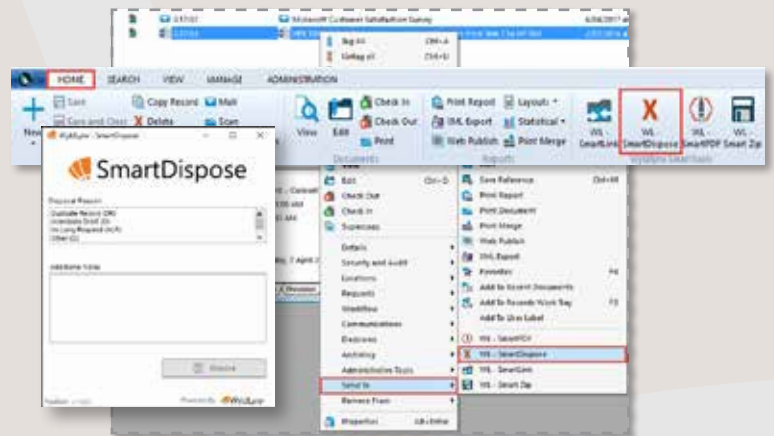

**“ SmartDispose has saved my organisation 900 hrs a year and allowed my staff to support the business more. ”**

User Feedback

### Using SmartDispose

Disposing of a file from view is as simple as clicking the button in the ribbon or toolbar, or right-clicking on the file and selecting SmartDispose.

Integrated into your favourite business software, SmartDispose will save you time and training, to let you get on with business!
