SMART TOOLS.

SmartLink

The WyldLynx SmartLink add-in allows users to insert hyperlinks into various applications pointing directly to Content Manager documents.

This gives users great functionality while retaining full security within the application.

WyldLynx

SMART TOOLS.

SmartLink

Features and Functionality

✓ Insert Hyperlinks into a range of applications, including Word, Excel, webpages, PDFs & emails

✓ Easy access to Content Manager documents from where you are

✓ Users can choose to link to the local CM client or the Web Client

✓ Easy options to name hyperlinks based on Content Manager metadata

" SmartLink allows the team to put hyperlinks in documents, emails and on our intranet with ease. It also easily creates links to the web client for people in the field. "

User Feedback

Using SmartLink

Inserting a hyperlink to a Content Manager document in an email, webpage or other document is easy, and the access level is up to you.

Integrated into your favourite business software, SmartLink will open any record while maintaining CM's compliance and security levels.

Requirements:
- Microsoft Windows 7, 8 or 10
- Microsoft .Net Framework 4.5+
- Content Manager 8.3+
