

# SmartLocations

The WyldLynx SmartLocations product enables users to successfully manage the large numbers of locations that arise when dealing with organisational-level content management systems.

WyldLynx

Linking Business & Technology

## Features and Functionality

- ✓ Easily find and convert unknown locations
- ✓ Identify any locations not related to a valid organisation and automatically relate
- ✓ Identify duplicates and merge them with the click of a button
- ✓ Discover locations without attached records preference
- ✓ Incredibly fast and efficient

*“ I had no idea my CM was in such a mess until I used SmartLocations. I'm so glad that it didn't just point out the issues, it saved me time and helped me fix them! ”*

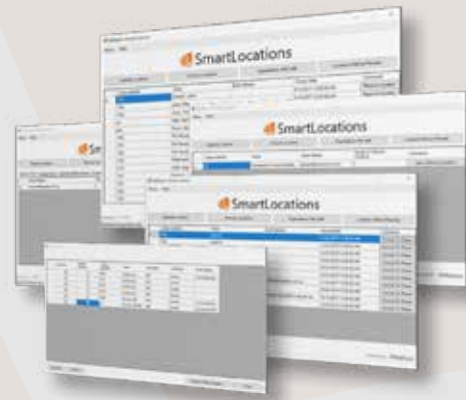

User Feedback

### Using SmartLocations

Take away the pain of managing locations from within Content Manager.

Just a few clicks of a button and all of your location management dreams can come true.

Well organised locations within CM makes everyone's lives easier, and provides richer functionality in the system for your team.
